

15<sup>th</sup> July 2024

Dear Parents/Carers,

We are delighted to confirm you that your child, has been offered a place on the AQA Level 2 Further Mathematics course, which will commence in September 2024. This is a fantastic achievement and a testament to their hard work and dedication in mathematics.

The AQA Level 2 Further Mathematics course is designed to extend and challenge students who have demonstrated a strong aptitude for mathematics. This course covers a range of advanced topics, providing a solid foundation for further study in mathematics and related disciplines.

Classes will begin week commencing 9<sup>th</sup> September 2024 and take place as two twilight sessions from 3.15-4.15. We will be holding a meeting for all students who have been offered a place on this course before we break up for summer to outline course expectations. During this meeting, students will be given preparatory work to complete over the summer, which is a prerequisite for the course, so please do encourage students to engage with this so they are well-prepared for the challenges ahead.

If you have any questions or require additional information about the AQA Level 2 Further Mathematics course, please do not hesitate to contact Mrs Wall (Head of Maths) or Mrs Harper (Assistant Head of Maths).

We are confident that your child will find this course rewarding, and we look forward to supporting them in their mathematical journey.

Yours sincerely

Mrs Wall  
Head of Maths
